

Mechanical Physician Scale

KEY FEATURES

Capability without complexity. The DS2100 provides an easier way to measure height and weight of patients in a hospital, medical office, school, or healthcare facility.

The device's straight-forward design doesn't mean it lacks valuable features. The DS2100 has a weighing capacity of 450lbs – that's over 15% more than our competition. The large two inch diameter wheels, optional from other scale manufacturers, are a standard item on this unit.

Switching between pounds and kilograms is quick and easy. Simply twist the weighbeams and weigh the patient. With standard and metric units on two separate, color-coded sides of the weighbeams, errors associated with mistaking kilograms for pounds are eliminated.

The convenient aluminum telescoping height rod is included and can be used to measure pediatric or adult patients. The scale's generously sized scale platform has a removable, slip-resistant cover.

Easy-to-use and loaded with standard features, Doran's DS2100 is an exceptional value.

SPECIFICATIONS

Warranty:	One Year
Maximum Capacity:	450 lb x 4 oz (200 kg x 100 g)
Construction:	Powder Coated Painted Steel
Dimensions:	Overall Dimensions 10.5" W x 22" L x 58" H Weighing Surface 10.5" W x 14.5" L
Displayed Units:	lb or kg on flip weighbeam
Height Rod Measurement Range:	24" to 79" (75 to 200 cm)
