Specifications

Galvanized floor scale base

TGB-44

Galvanized floor scale with checkered safety tread plate is a great alternative to stainless steel platforms. Hot-Zinc coating galvanization provides the most effective and economical way of protecting steel against corrosion. Galvanized steel offers a unique combination of properties unmatched by any other material. Hot-Dip galvanizing is a process where the steel is immersed in a tub of molten zinc, resulting in a metallurgically bonded alloy coating that protects the steel from corrosion. Galvanized floor scales are used where moisture and dampness present at the installation site. Our floor scales are equipped with standard stainless steel hermetically sealed load cells, stainless steel captured ball feet and a stainless steel junction box with top & side access, to accommodate all applications. Size 4' x 4', Weight: 289 lb

TOTALCOMP LIMITED WARRANTY

Totalcomp warrants this product to be free of defects in materials and/or workmanship and suitable for the purpose(s) intended as outlined on this sheet. This warranty is effective and shall cover the purchaser for one year from the date of shipment from our plant. If this product is found to be defective by our inspection in accordance with the above listed criteria, we will replace or repair in at our expense. For warranty service, please obtain a return authorization number from us and return the item, shipping prepaid, with a written description of the problem. We will respond promptly with the results of our evaluation.
